

Prior to Camp

We're working hard to keep you safe at camp, but we need your help. Before you come to camp, make sure you're following all public health guidelines and monitor the symptoms of everyone within your household. We're all in this together!

Check-In

We're excited to see you and show you around the newly expanded site! Please bring a mask with you to wear during the check-in process.

Masks and Bubbles

Campers will be able to mingle and play with all other campers in their program this year and distancing will not be required. While masks are certainly encouraged, they will not be mandatory after check-in.

Disinfecting & Handwashing

Brigadoon has always had high cleaning standards and this year will be no exception. Our facility cleaning protocols will meet or exceed public health guidelines. Hand hygiene for campers and staff will remain a priority.

COVID-19 Vaccines

As an organization serving immunocompromised and medically vulnerable children and out of care for our greater community, we require that all campers and staff are fully vaccinated. Valid medical exemptions will be accepted.

Rapid Testing

All campers will be asked to take a rapid test 24 hours before arriving on-site. Brigadoon will ask whether the camper has had a test when they arrive for check-in and we'll have extra tests at camp if needed.
